

TOOL // Observations of Student Performance

What is it used for?

The tool allows the teacher to record key observational notes on student performance during French and to keep track of feedback given and student response to feedback.

How do you use it?

The teacher runs off a number of the sheets to keep on a clipboard. During small group activities or French centres, the teacher chooses a focus for observations and records quick notes regarding what they observe and feedback and support given to the student. The form allows for observations of two students at a time and for two opportunities to record observations.
