

TOOL // Google Forms Project Assessment

What is it used for?

The tool allows the teacher to record and share assessment data with students regarding their French task completion.

How do you use it?

The teacher creates the form in Google Docs and records student performance using the rubric indicators. The result and specific feedback for improvement are then emailed to the student so that they have access to the feedback and assessment to guide future project completion.

Rubric - Settlement factors

* Required

Student Name *

Student email *
