

TOOL // Math Assessment Data Gathering Grid

What is it used for?

The tool allows the teacher to identify those student in need of enrichment, concept or skill instruction or remediation in particular math units of study.

How do you use it?

During preliminary activities in a particular math unit, i.e. Isometric drawings, the teacher identifies students who have mastered the skill or concept, are progressing or emerging in their understanding. By recording the names in the appropriate columns the teacher then identifies groupings for teaching/ learning.

How do you adapt it to other subjects and topics?

This tool can be adapted for any subject area.

Concept/Skill _____

Assignment/Task _____

Mastered	Progressing	Emerging	
		Needs Concept Instruction	Needs Basic Skill Practice
Enrichment	Follow Up	Follow Up	Follow Up

Whole Class Follow Up _____

Absent _____
