

TOOL // Physical Education Observation Checklist

What is it used for?

The tool is used to record observations during physical education. It provides a structure for quickly collecting a range of information on student achievement of physical education expectations.

It may be used for assessment for learning as well as assessment of learning.

How do you use it?

Each skill box contains three opportunities to record student performance with the final one being a summative assessment.

The use of check plus ($\checkmark+$), check (\checkmark), check minus ($\checkmark-$) and NI allows the teacher to identify students who have developed the skills and those who need more support so as to set next steps.

It is a good idea to keep this tool on a clipboard. As the students are involved in an activity, the teacher can make quick observations related to particular skills.

Physical Education Observations

√+ consistently, with a high degree of accuracy √ usually, with considerable accuracy √- sometimes, with some accuracy NI – rarely, with limited accuracy

| Student | Coordination, body control, space awareness | Application of movement skills | Communicates positively, supportively | Participates fully, enthusiastically | Follows safety procedures | Follows instructions, stays on task |
|---------|--|--|--|--|--|--|
