

## **TOOL // Star and Step Feedback Form**

### **What is the tool?**

Star and Step Feedback Form linked to Learning Goals

### **What is it used for?**

The strip identifies the Learning Goal that is the focus of feedback. The Star and Stairs reflect student strengths and next steps. The five pictures across the bottom indicate where the child feels they are or the teacher feels the child is, on a five point pictorial scale.

### **How do you use it?**

A file is created with the form, two to a page. The learning goal, in student friendly language, that is the focus of the feedback, can easily be typed across the top before copying the forms. The strips are attached to student work and reflect the areas that the student did well on and identifies specifically a next step. The “happy” face that best reflects the work is circled.

### **How do you adapt it to other subjects and topics?**

This can be used with any subject and any grade.
