

## **TOOL // Counting by 2's Checklist**

### **What is the tool?**

Skip Counting By 2's Assessment Checklist

### **What is it used for?**

This tool is used to assess student ability to count by 2's.

### **How do you use it?**

This tool was developed by my colleague Aynsley Maxwell and is a way to gather individual student data while the class is completing explorations. It is one sheet divided into grids with a place for a student's name and a blank box beside so that quick notes can be made as to how well the student was able to complete the task. Notes can indicate if the child used manipulatives, was able to do the task orally, whether they added on or how long and at what pace they were able to complete the task.

### **How Do You Adapt It?**

The Grid can be used for any type of oral or observational data collection because the task can simply be identified at the top and the "*look fors*" reflective of the particular activity.

Number Sense-Skip Counting: Counting by 2s  
manipulatives, orally, added on what pace
