

TOOL // Primary Student Learning Skills Self-assessment

What is it used for?

The tool allows the students to self-assess their application of learning skills in the classroom.

How do you use it?

First, the teacher and students have a discussion related to what the learning skills are and why they are important. Each month on the back of the parent letter home is a copy of the self-assessment. Students complete by circling the figure they feel represents their learning skills. The teacher collects and add their comment or what they feel the child is demonstrating. With teacher support the students write a goal for the next month. The letter and self-assessment go home for parent information and comments.

How I Learn

Rock Star- all the time

Good - Most of the time

Satisfactory - Sometimes

Needs Improvement - I need teacher reminders

Learning Skills	How I am Doing
I do my homework and bring my book back.	
I pay attention in class.	<i>Try sitting closer to me in learning time.</i>
I get my work done in the time I am given.	<i>If you pay closer attention it would be easier to get your work done.</i>
I am nice to others.	
I try to solve problems.	
I take part in class activities.	
I listen and talk respectfully.	
I work well with a group.	

Next month I will try to improve on

Bring my homework book everyday.

Parent Comments

We will help to make sure his book is in his bookbag each night.
