

## **TOOL // A Look At My Week Primary Learning Skills Self-Assessment**

### **What is the tool?**

Student Self-Assessment

### **What is it used for?**

The tool provides a forum for students to reflect on and self-assess their learning over the course of a week.

### **How do you use it?**

Every week, the student completes the form independently or with the teacher scribing, depending on the child's age. The form may be altered to be completed monthly, rather than weekly, if this is more feasible. This form is sent home for parent information and support.

The **Something to be Proud of** box asks students to think about something they did well over the period of time (i.e., new learning, application of learning skills, completion of a particular task). In the **Something to Talk About** box, students record what they feel they need to improve upon.

If the student completes the form independently, the teacher conferences with the student and completes the **Message from My Teacher** section. This section allows the teacher to share a star and a next step for the student.

The **Message from Home** section allows parents to indicate how they will support their child's learning journey at home.
