

## Student J

Date	Task	Feedback from Ms. Campbell	
			
April 7	Monday's math	Student J, these problems are very well done. The answers are all correct, and you shared what was happening in your brain by showing me your work in numbers and pictures.	
April 8	Letter to Jacob	This letter is AWESOME! You included all of the checklist items that should be in a letter. You shared really interesting details. I can tell that you really miss Jacob. I like that you asked Jacob questions. He's more likely to write you back that way.	
April 7	Math CN Tower climb	Thank you for your math story. That's a great idea to use a FitBit to count your steps!	How do you know that it takes 10 seconds to walk up a flight of stairs?
April 8	Unstuck Spinner	I think the picture of you with your spinner is so great! You have such a big smile.	What strategy are you going to choose when you get stuck? Or are you just going to let it spin and you do what the spinner lands on?
April 8	Math - grocery shop for Ms. Campbell and your family	Great work. You remembered the instructions to include the name of the item and how much it costs. You stayed under \$25 and \$50.	What tool did you use to add the items? Did you use a calculator? Why did you pick certain items for me and for your family?
April 8	Word Ladder	Well done. You got all the words correct. You must have read the clues very closely.	

April 8	Reading - favourite part	Thank you for sharing your favourite part.	Next time, tell me how the kids made the game fair so I can learn more about your book.
April 9	Spelling test	WOW! Greyson, you did so well. You must have studied really hard. I'm so proud of you.	What is the hardest part for you when spelling words? Sounding them out? Do you see the words in your head before you write them down on paper?
April 9	Reading - Connections	Thanks for telling me that your book reminds you of the rules in soccer.	Next time, give me an example of a rule from your book and an example of a rule from soccer.
